PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (2026, CGPA 8.3/10) with hands-on experience building and deploying a deep learning image-classification pipeline using TensorFlow/Keras and a pretrained Vision Transformer, evaluated with scikit-learn and deployed via Flask/Streamlit. Also experienced in full-stack development using Java, Spring Boot, and React.js, with a working knowledge of REST API design, relational database design, and Agile workflows. Seeking an AI Engineer Trainee role to build production ML skills — data preprocessing, model training and evaluation, and AI-application integration — under senior guidance.

TECHNICAL SKILLS

- Machine Learning: TensorFlow, Keras, Vision Transformer (transfer learning), scikit-learn (classification metrics, confusion matrix, ROC/PR curves), image classification
- Data & Visualization: NumPy, Pandas, Matplotlib, Seaborn
- Languages: Python, Java (Core, OOP, J2EE — Servlets, MVC)
- Application Integration: Flask, Streamlit, RESTful APIs, Spring Boot
- Database: MySQL (DDL, DML, Joins, Schema Design & Normalization); working exposure to MongoDB

PROJECTS

AI-Powered Skin Type Classification & Skincare Recommendation System | TensorFlow · Keras · scikit-learn · Flask/Streamlit Jan 2026 – Apr 2026

- Built and trained an image classification model using a pretrained Vision Transformer (ViT-B16) via transfer learning in TensorFlow/Keras, reaching ~85% test accuracy across 3 skin-type classes (oily, dry, acne-prone).
- Evaluated model performance using scikit-learn (classification report, confusion matrix, ROC and precision-recall curves) and visualized training/validation accuracy and loss with Matplotlib and Seaborn.
- Applied early stopping and iterative hyperparameter adjustment (learning rate, dropout) during training to reduce overfitting.
- Deployed the trained model in a Flask/Streamlit web application with image upload, real-time inference, and personalized skincare and diet recommendations.
- Added a multilingual text-to-speech accessibility feature (gTTS) generating spoken skincare guidance in English, Hindi, and Telugu.

Learning Management System (LMS) | Java · Spring Boot · React.js · MySQL · RBAC May 2026 – Jul 2026

Capstone project — Full Stack Development Training Program

- Designed and built a full stack LMS with a Spring Boot backend and React.js frontend, modeling Users, Courses, Content, and Enrolment entities using OOP and OOAD principles.
- Built RESTful APIs for course creation, student enrolment, and progress tracking; integrated with React.js dynamic routing and state management.
- Designed a normalized MySQL schema with joins and subqueries for users, content delivery, and completion records.

EXPERIENCE

AWS Cloud Computing Virtual Internship — SaRaj Info Tech Jun 2024 – Jul 2024

- Deployed and managed web applications on AWS EC2; configured S3 for object storage and IAM for least-privilege access control.
- Practiced monitoring and optimizing cloud resource usage for cost and performance.

TRAINING PROGRAMS

Full Stack Development Training Program — Java Feb 2026 – Sep 2026

- Built backend services using Spring Boot and Core Java as part of a capstone LMS project; applied OOAD to design system modules.
- Built component-based UIs with React.js integrated with backend REST APIs; worked with MySQL for data storage and queries.
- Practiced Agile methodology, Git version control, and clean code standards throughout the program.

EDUCATION

B.Tech — Computer Science & Engineering | K.S.R.M College of Engineering, Kadapa

2022 – 2026 | CGPA: 8.3 / 10.0

Intermediate (MPC) — Sri Sai Siddhartha Junior College, Tadipatri

2020 – 2022 | 81%

CERTIFICATIONS

Java Full Stack Development · AWS Cloud Computing · Python Programming · Machine Learning · Data Structures and Algorithms
